To Whom It May Concern,

I am writing to provide my strongest recommendation for David Munglah.

I have known David for ~2 years as part of the Bioinformatics group at Eagle Genomics and for the last year, I have been David's line manager in the Bioinformatics Pipeline Team. During this time, I have seen David's aptitude for programming expand dramatically. He has also developed an excellent understanding of bioinformatics and gained valuable experience in workflow design and development. David has excelled at picking up new skills and deploying these skills independently to solve complex problems. Finally, David has excellent communication skills and regularly communicates ideas to interdisciplinary groups across Eagle Genomics.

I firmly believe David has the necessary expertise and character to be an outstanding addition to any team.

Yours sincerely,

Dr Ryan Ames

Senior Bioinformatics Scientist, Eagle Genomics.
